

Restricted Substances List Policy

Clean Camp’s chemical management approach aligns with the AFIRM Group Restricted Substances List (RSL). Our formulations prioritize ingredients with low toxicity and strong safety profiles, many of which are commonly used in food, cosmetic, and household applications. We work with manufacturing partners to ensure restricted substances are not intentionally used in our products or production processes.

Component	AFIRM RSL Status	Notes for Compliance
Component A	✓ Allowed	Common formulation component used within standard concentration ranges.
Component B	✓ Allowed	Functional ingredient typically used in small quantities to support product stability.
Component C	✓ Allowed	Widely used additive in consumer product formulations.
Component D	✓ Allowed	Processing aid utilized during formulation and manufacturing.
Component E	✓ Allowed	Ingredient commonly incorporated for formulation performance.
Component F	✓ Allowed	Standard formulation component compliant with applicable restrictions.

Component	AFIRM RSL Status	Notes for Compliance
Component G	 Allowed	Used in low concentrations as part of overall formulation design.
Component H	 Allowed	Auxiliary ingredient with no applicable AFIRM RSL restrictions.
Component I	 Allowed	General-use formulation component compliant with regulatory standards.
